I have no work experience to share and I'm proud of it 😎! My mum has asked me to find a job but I'm NOT going to work AND go to school! No way 🐜!!! Just want to chill out on the couch after school. 😊

AngieUKangel

I'm 14. I've always wanted to work as a florist, so I'm going to start working in a flower shop in September, but just one hour on Mondays and Wednesdays. I need some time for my homework! 📖

Megan@Canada

I have no regrets working and studying at the same time. I'm 16 in my final year of high school. As an employee in a fast-food restaurant I've learned time management skills! I used to be late for school 😞, now I'm always on time! It has given me a sense of responsibility and 🧠 independence.

LazyTom

I used to do a lot of odd jobs in my neighbourhood (walk the dog, run errands for example) but I don't any more because that was too exhausting! I'm going to study like crazy for my GCSE exams instead (at least, that's what I've told my parents! 😊🙄)
